My biggest concerns of the wal marts of the words is simply who will have control of our economics if we allow them to continue to destroy the American Dream. We operate a service business both in the Phoenix market and out lining small towns. In the two small towns we do business Wal-Mart has recently opened a super store, we now are dealing with 15 different small business having trouble paying us in addition to several who have all ready filed bankruptcy. Thses business include a grocery store two office supply operations, small furniture store and a independent appliance store. These all apeared to be health business 8 months ago. Please do some impact studies before allowing this to continue.
